Equal Opportunity Employer/Program
Auxiliary Aids and Services Are Available Upon Request to Individuals with Disabilities
1-800-259-5154 (TDD)

MISSION

The Department of Labor is a state agency utilizing state, federal, and private resources to provide the training, employment, assistance, and regulatory services necessary to increase employment and promote workplace safety and expanded employment opportunities in the state of Louisiana in a climate favorable to business, workers, and job seekers.

The total cost of publishing 800 copies of this public document, including first printing and reprints, was \$800.00. This document was published by the Louisiana Department of Labor, Office of Occupational Information Services, Research and Statistics Division, P.O. Box 94094, Baton Rouge LA 70804-9094. Its purpose is to disseminate information pertaining to labor market developments and employment trends under the authority of Part 602.6, Title 20, and Chapter V. of the Code of Federal Regulations. It was printed in accordance with the standards for printing by state agencies established pursuant to R. S. 43:31.

TECHNICAL NOTES

This publication has been prepared to meet the numerous employer requests for population and labor force data by sex, race, and ethnic group for the state, metropolitan statistical areas (MSA's), and individual parishes. Tables included meet the basic requirements of 41 CFR Part 60-2, Subpart B, (Purpose and Contents of Affirmative Action Programs.)

Population (pages 1 – 6):

The 2000 census estimates are used to provide race and sex demographics of the population of the state and each parish. The census figures are incorporated in all population tables from the May 2002 publication forward. Between each ten-year census period we receive annual population estimates at the state and parish level from Louisiana Tech University, Research Division of the College of Administration and Business. These population estimates are used for total population and the latest census population ratios for race and sex are applied to the annual population figures to produce estimates by race and by sex.

Labor Force (pages 7 – 24):

Data is derived from the monthly Current Population Survey (CPS) conducted of approximately 60,000 households across the United States. The Bureau of the Census conducts this survey for the Bureau of Labor Statistics (BLS.) The Local Area Unemployment Statistics (LAUS) is a Federal – State cooperative endeavor that provides monthly and annual labor force, employed, and unemployed data at the state, Metropolitan Statistical Area (MSA), and parish levels by place of residence. The sample size for Louisiana has remained between 500 and 600 households for several years because of the lack of population growth in the state. With a sample this small we are unable to produce data by race or by sex of the labor force on a monthly level. We use the same methodology stated above (using the latest census ratios applied to the latest annual average data) for estimating the race and sex of the labor force for the state and each parish. The 2000 Census labor force components by race, sex, and age have been incorporated into this year's publication. Because of the small sample size data users are cautioned when using labor force figures as a sole economic indicator, and also because the unadjusted data on a month-to-month level tends to be volatile.

The **labor force** figures represent individuals 16 and over who were either working or actively looking for work during the reference week (the 12th of the month) of the survey. The total numbers of employed and unemployed equal the civilian labor force.

Employed refers to those individuals 16 and over, who reported that they were working during the reference week of the 12th of the month.

Estimated **unemployed** is derived from those individuals 16 and over, which responded that they were unemployed but were actively looking for work during the reference week of the 12th of the month.

Occupational Breakout of the Civilian Labor Force by Sex and Ethnic Group (pages 25 - 97)

Detail statistics on the breakout of the labor force by occupation, sex, and race is also a ten-year census product. Again, a census ratio is calculated of the number of persons by occupation, sex, and race in the labor force for each parish, Metropolitan Statistical Area (MSA) and statewide. The resulting ratio is then applied to the labor force figure of each area annually. The 2003 publication is still using the 1990 Census special tabulation of occupations by race and sex. The special run request for the 2000 Census includes suppressed data because of mandatory confidentiality guidelines. This data will be used to update the 2004 publication.

Job Center Registrants:

Data for this section of the publication will not be available for this year. Occupations of active job registrants at Louisiana Department of Labor Job Centers will be included in future publications as soon as it is available.
